

MONESH R

DATA ANALYST | BUSINESS INTELLIGENCE | AI DATA QUALITY | OPERATIONS ANALYTICS

Bengaluru, Karnataka, India | +91 8217019750 | moneshmuddu@gmail.com | linkedin.com/in/moneshr | github.com/monesh-r

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 1+ year of experience across Business Intelligence, educational analytics, AI data quality, operations analytics, dashboard development, reporting automation, and data governance. Experienced in transforming high-volume operational and academic data into reliable dashboards, KPI reports, validation workflows, and decision-ready insights. Delivered measurable impact including 80% reduction in manual result-communication effort, 99%+ data accuracy, and analytics covering 2,000+ students. Proficient in Python, SQL, Power BI, Advanced Excel, Pandas, NumPy, data validation, ETL testing, cohort analysis, funnel analysis, and process automation.

CORE COMPETENCIES

Data Analytics • Business Intelligence • Power BI • SQL • Python • Advanced Excel • Dashboard Development • KPI Reporting • Student Performance Analytics • Educational Analytics • Data Quality • Data Validation • Data Profiling • Data Standardization • Data Governance • ETL Testing • Data Reconciliation • Reporting Automation • Workflow Automation • Cohort Analysis • Funnel Analysis • Attrition & Retention Analysis • Trend Analysis • Root Cause Analysis • EDA • Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Operations & Data Analytics Associate

BASE Educational Services Pvt. Ltd. | April 2026 – Present

- Perform end-to-end student performance analytics for 2,000+ students, identifying chapter-, question-, test-, and student-level performance trends to support academic decision-making.
- Develop Power BI, Excel, and Google Sheets dashboards and KPI reports for academic and operational performance monitoring.
- Design automated student-result communication workflows using Meta WhatsApp Business API, reducing manual effort by 80%.
- Build result-validation and data-quality workflows covering correctness, completeness, duplicate detection, reconciliation, and standardization.
- Conduct deep test-wise and student-wise analysis including correct/wrong/not-attempted questions, weak chapters, performance trends, and ideal-time analysis for correctly attempted questions.
- Maintain 99%+ data accuracy through systematic validation, reconciliation, quality assurance, and data governance; automate recurring reporting workflows to improve turnaround time.

Data Analyst – Marketplace Operations (AI Control Tower)

Umoja Marketplace Pvt. Ltd. | August 2025 – January 2026

- Built and maintained automated Business Intelligence dashboards for daily NPS monitoring, including promoter, passive, and detractor trends, and presented insights to management and CEO-level stakeholders.
- Analyzed 2,000+ payroll and workforce records across 20 enterprise datasets, consolidating fragmented inputs into accurate, consistent, standardized reporting datasets.
- Performed cohort, attrition, retention, attendance, paid-days, journey-continuity, and drop-off analysis across Aug–Jan operational periods.
- Developed funnel and flow-based reporting for workforce and PG-resident datasets, including consolidated base data, cohort summaries, and operational reporting views.
- Developed Power BI dashboards monitoring onboarding, retention, attrition, SLA compliance, and operational KPIs; performed EDA to identify trends and performance gaps.
- Designed Python/SQL validation and reconciliation workflows for duplicate, inconsistent, and transformed records; automated recurring reports using Python, SQL, and Excel.

AI Data Quality Analyst Intern

Rooman Technologies Pvt. Ltd. | March 2025 – August 2025

- Performed data profiling, cleansing, annotation, verification, and quality assessment on enterprise and AI datasets.
- Developed Python and SQL validation workflows for reconciliation, duplicate detection, schema validation, and data consistency checks.
- Executed ETL testing and source-to-destination validation to verify transformed datasets.
- Supported AI output evaluation, prompt testing, quality checks, and Power BI reporting for data-quality KPIs.

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, Pandas, NumPy, Matplotlib, Scikit-learn, EDA, Data Cleaning, Root Cause Analysis

BI & Visualization: Power BI, Advanced Excel, Looker Studio, Google Sheets, Dashboard Development, KPI Reporting, Data Visualization

Data Quality & Engineering: Data Validation, Data Profiling, Data Standardization, Data Reconciliation, ETL Testing, Data Governance, Schema Validation

Automation & Tools: Workflow Automation, Reporting Automation, Meta WhatsApp Business API, Git, GitHub, Jupyter Notebook, VS Code, MySQL

SELECTED PROFESSIONAL & APPLIED PROJECTS

Data Quality & Results Automation Platform

Python | Data Quality | Validation | Annotation | Meta WhatsApp Business API

Python-based workflow platform for result processing, validation, annotation, reporting, and WhatsApp-based result communication, with modular validators, processing pipelines, sample data, and automated tests.

GitHub: <https://github.com/monesh-r/Data-Quality-Results-Automation-Platform>

Student Performance Analytics & Question Analysis Framework

Power BI | Excel | Educational Analytics | Performance Analytics

Academic analytics solution for test-wise and student-wise performance analysis, including top-performer benchmarking, weak chapters and questions, correct/wrong/not-attempted analysis, trend reporting, and ideal-time analysis.

GitHub: <https://github.com/monesh-r/Student-Performance-Analytics-Dashboard>

GitHub: <https://github.com/monesh-r/Student-Performance-Intelligence-Analytics-Platform>

AI Control Tower – NPS & Operations Intelligence

Business Intelligence | NPS | Power BI | Cohort & Funnel Analytics

Applied analytics work covering automated NPS dashboards, promoter/detractor monitoring, workforce and payroll consolidation, cohort, attrition, retention, attendance, funnel, and flow analysis for management reporting.

GitHub: <https://github.com/monesh-r/Enterprise-Workforce-Cohort-Retention-Analytics>

GitHub: <https://github.com/monesh-r/NPS-Intelligence-Executive-Reporting-Automation-Platform>

Interactive Presentation Generator

Python | Streamlit | Data Visualization | PowerPoint Automation

Streamlit application for CSV, sample, or manual data input, visualization creation, customizable slide layouts, and PowerPoint export.

GitHub: <https://github.com/monesh-r/Interactive-Presentation-Generator>

Personalized Learning Tracker

SQL | Database Design | Learning Analytics

SQL database and query suite for users, courses, modules, permissions, assignments, and progress tracking, with queries for completion, scores, and learning activity.

GitHub: <https://github.com/monesh-r/Personalized-Learning-Tracker>

Wellness & Productivity Analytics Dashboard

Python | Pandas | Data Visualization | Trend & Correlation Analysis

Analytics solution for productivity, habits, study activity, mood patterns, and system usage with structured logging, trend analysis, correlation analysis, and visual reporting.

GitHub: <https://github.com/monesh-r/Wellness-Productivity-Dashboard>

Cloud Computing in Educational Sectors

Cloud Computing | Educational Technology | Data Management

Academic project exploring cloud technologies for educational environments, focusing on scalable infrastructure, centralized data management, accessibility, collaboration, and technology-enabled learning.

GitHub: <https://github.com/monesh-r/Cloud-Computing-in-Educational-Sectors>

AI Virtual Mouse System

Python | Computer Vision | MediaPipe | Gesture Recognition

Computer vision application using real-time hand landmarks and gesture recognition for touchless cursor movement, mouse clicks, and system controls.

GitHub: <https://github.com/monesh-r/AI-Virtual-Mouse-System>

EDUCATION

B.E. — Artificial Intelligence & Machine Learning, 2025 | CGPA: 8.15

Pre-University: 94.33% | SSLC: 95.36%

CERTIFICATIONS & TRAINING

AI Data Quality Analyst Certification — Rooman Technologies Pvt. Ltd. • Python Programming • Power BI • SQL Fundamentals • Data Analytics & Business Intelligence

Java Full Stack Certification — Alpha Tech Academy. • Java • SQL • HTML • My SQL • Java Script

CAREER FOCUS

Data Analyst • Business Intelligence Analyst • Operations/Data Analytics • AI Data Quality • Educational Analytics • Reporting & Process Automation • Analytics Engineering • Generative AI / AI-enabled Analytics

ADDITIONAL INFORMATION

Strong focus on data accuracy, analytical problem-solving, stakeholder communication, dashboard storytelling, process improvement, and converting operational data into measurable business and academic insights.
